

# It's All Good

Graeme Connors/Mark McDuff

Can't stop the rain from falling down  
or hold back the tide  
some things we don't find a way around  
no matter how we try  
and everyone has their own story to tell  
eventually we figure it out  
once you've been down to the bottom of the well  
you know the way out

Every road's going somewhere  
Every river meets the sea  
every one is on a journey  
and where I am is where I want to be  
it's all good it's all good

I don't know what tomorrow will bring  
hey nobody does  
you think you're ready for just about anything  
then along comes love  
and some days are perfect some days are hell  
some days you just make it through  
but once you've been down to the bottom of the well  
you know a thing or two

Every minute in the hour  
Every hour in the day  
every day it's getting better  
believe you me whatever comes your way  
it's all good it's all good

These days I live my life without any deadlines  
I'm a little older but I'm a little wiser I do it in my own sweet time

Every road's going somewhere  
Every river meets the sea  
every one is on a journey  
and mmm It's all good  
Every minute in the hour  
Every hour in the day  
Every day we're together  
I can't help myself but look at you and say  
It's all good it's all good
